

Forensic Case Dossier: State of Maharashtra vs. Yogesh Raut & 3 Others (Pune Techie Nayana Pujari Case)

Comprehensive Evidentiary Matrix, Competing Hypotheses & Provenance Record • **Criminal Investigation Docket**

Case Identifier:	Docket #1	Investigation Status:	CLOSED
Priority Level:	High	Incident Date:	2026-10-06
Primary Location:	Jurisdictional Crime Scene	Victim(s) on Record:	N/A
Investigating Unit:	PI Kishor Mhaswade	Compilation Date:	2026-10-08 18:53:34 UTC

MANDATORY EVIDENTIARY DISCLAIMER: DECISION SUPPORT, NOT A JUDICIAL CONCLUSION

This analytical case dossier was synthesized by **Evidentia-AI** using the Analysis of Competing Hypotheses (ACH) methodology developed by Richards J. Heuer Jr. (CIA/Sherman Kent Center). This system serves strictly as an objective, bias-mitigating decision support framework. It evaluates mathematical diagnosticity, consistency, and falsification likelihood across candidate theories. **This dossier does not constitute a final judicial verdict, nor does it replace independent expert forensic testimony, chemical laboratory analysis, or the statutory judgment of a competent court of law.** All electronic exhibits are certified under Section 65B of the Indian Evidence Act.

1. Executive Summary & Case Synopsis

Case Narrative: Landmark Pune investigation into abduction, robbery, and murder of Synechron software engineer Nayana Pujari. Analyzed 4 suspects through ATM CCTV, CDR tracking, vehicle forensics, and approver confession under Sec 164 CrPC.

ACH Leading Hypothesis: Coordinated Abduction & Robbery by Raut Gang (Relative Support: **49.6%**, Inconsistency Score: **0.00**).

Theory Mechanics: Yogesh Raut, Rajesh Chaudhari, Mahesh Thakur, and Vishwas Kadam conspired to lure victim into Qualis cab, rob ATM funds, and execute in Zarewadi forest.

2. Evidentiary Exhibit Inventory & Integrity Audit

Each physical and digital exhibit is logged with its originating agency, evidence category, cryptographic SHA-256 fingerprint, and chain-of-custody verification under Section 65B of the Evidence Act.

Exh #	Filename & Origin	Category	SHA-256 Fingerprint	Sec 65B	Status

4. Analysis of Competing Hypotheses (ACH) Matrix

Heuer's methodology requires assessing each exhibit across all mutually competing hypotheses. Scores are computed through non-linear inconsistency penalties (Heuer Step 4 & 5), normalized across candidate theories.

Rank	Hypothesis Scenario	Support %	Inconsistency	Robustness Range	Verdict Stability
H1	Coordinated Abduction & Robbery by Raut Gang Yogesh Raut, Rajesh Chaudhari, Mahesh Thakur, and Vishwas Kadam conspired to lure victim i	49.6%	0.00	49.6% - 49.6%	Moderate Stability
H2	H1: Premeditated Abduction, Robbery, and Murder by Yogesh Raut and Accomplices Yogesh Raut, Mahesh Thakur, Vishwas Kadam, and approver Rajesh Chaudhari acted in a coordi	49.5%	0.00	49.5% - 49.5%	Moderate Stability
H3	H2: Rajesh Chaudhari and Co-Accused Primary Execution with Yogesh Raut in a Secondary Role Approver Rajesh Chaudhari and other co-accused (Mahesh Thakur and Vishwas Kadam) planned a	0.9%	4.90	0.9% - 0.9%	Moderate Stability
H4	Solo Opportunistic Robbery Without Conspiracy Defense contention that Yogesh Raut acted purely alone without pre-meditation or accomplic	0.0%	16.69	0.0% - 0.0%	Moderate Stability
H5	Third-Party Abduction Post Cab Drop-off Theory that victim exited cab safely and was assaulted by unrelated third-party assailant.	0.0%	19.41	0.0% - 0.0%	Moderate Stability
H6	H3: Involvement of an Outside Third-Party Syndicate Framed by Co-Accused The abduction, robbery, and murder of Nayana Pujari were perpetrated by an unknown third-p	0.0%	19.25	0.0% - 0.0%	Moderate Stability

Per-Exhibit Diagnostic Contribution Breakdown:

Mathematical decomposition of how each exhibit informs the leading hypothesis (Heuer Step 4). Shows resolved reliability (R_i), diagnosticity weighting (D_i), and net mathematical contribution.

5. Contradictions & Heuer Step 6 Sensitivity Analysis

Detected Evidentiary & Testimonial Contradictions:

ID	Statement A	Statement B	Conflict Classification	Confidence
C-1	Suspect Yogesh Ashok Raut claimed he was at his residence in Khed all night on 07-Oct-2009.	Yerwada SBI ATM CCTV Exhibit captures Yogesh Raut at 21:42:15 IST withdrawing cash with victim's ATM card.	Alibi Discrepancy	99%
C-2	Co-accused Rajesh Chaudhari stated in Section 161 CrPC statement that the cab never stopped at Kharadi Bypass.	Kharadi Cellular Tower Dump (Cell ID 404-20-1102) records co-accused IMEI stationary from 20:30 to 22:15 IST.	Timeline Conflict	96%
C-3	Accused Vishwas Kadam claimed the silver Qualis was used solely for authorized Synechron company transport.	FSL Kalina Serology report reveals latent O+ human blood matching victim Nayana Pujari on rear floor mat.	Forensic Inconsistency	99%
C-10	Accomplice Rajesh Chaudhari is seen waiting outside the glass door in the getaway vehicle, a silver Toyota Qualis bearing registration MH-12-AR-2541 during the ATM transactions at 21:42:15 IST.	Between 20:30 and 22:15 IST, three mobile IMEIs co-located under the Kharadi Bypass cell tower sector: IMEI registered to Yogesh Ashok Raut, IMEI registered to Mahesh Thakur, and victim Nayana Pujari's cellular handset, with cell tower handover tracking eastward movement along Pune-Ahmednagar Highway towards Rajgurunagar.	Timeline Conflict	88%

C-11	Accused Yogesh Ashok Raut was observed at the ATM keypad withdrawing Rs 61,000 across three consecutive transactions.	Between 20:30 and 22:15 IST on 07-Oct-2009, IMEI 35489002148102 registered to Yogesh Ashok Raut was co-located under cell tower antenna sector 404-20-1102 at Kharadi Bypass.	Alibi Discrepancy	95%
C-12	Accomplice Rajesh Chaudhari was seen waiting outside the glass door in a silver Toyota Qualis bearing registration MH-12-AR-2541.	Between 20:30 and 22:15 IST on 07-Oct-2009, IMEI 35910293481230 registered to Mahesh Thakur was co-located under cell tower antenna sector 404-20-1102 at Kharadi Bypass.	Identity Conflict	90%

Heuer Step 6 Sensitivity & Critical Pivot Exhibits:

Sensitivity analysis systematically simulates the omission of each exhibit to identify 'critical pivots'—single pieces of evidence upon which the top-ranked hypothesis entirely depends.

Exhibit	Diagnosticity	Critical Pivot?	Top Hyp With	Top Hyp Without	Impact Level
None	0.00 (None)	No			CRITICAL PIVOT
None	0.00 (None)	No			ROBUST INSENSITIVE
None	0.00 (None)	No			ROBUST INSENSITIVE
None	0.00 (None)	No			ROBUST INSENSITIVE
None	0.00 (None)	No			ROBUST INSENSITIVE
None	0.00 (None)	No			ROBUST INSENSITIVE
None	0.00 (None)	No			ROBUST INSENSITIVE
None	0.00 (None)	No			ROBUST INSENSITIVE
None	0.00 (None)	No			ROBUST INSENSITIVE
